Second Language Tutoring using Social Robots

Project No. 688014

L2TOR

Second Language Tutoring using Social Robots

Grant Agreement Type: Collaborative Project
Grant Agreement Number: 688014

D8.1 Website

Due Date: **31/03/2016**
Submission Date: **05/01/2016**

Start date of project: **01/01/2016**   Duration: **36 months**

Organisation name of lead contractor for this deliverable: **Name**

Responsible Person: **Name**   Revision: **1.0**

Contents

Summary

The project has a bespoke website at www.l2tor.eu reaching out to different audiences: at the moment the focus of the website is on the researchers and professionals, and on the general public. Later in the project, the website will contain a white paper aimed at the digital learning environment industry, and at educational professionals and service providers. This website was implemented in late 2015 and was made public at the start of the project.

Future plans

The industry and education sections will contain reports and fact sheets relevant to the design and deployment of robot-assisted tutoring, and language tutoring in specific, together with advertisements for industry-focused events.

The academic section already contains publication, and will be updated with new publications and public data sets, which are deemed less relevant for a large audience. The front page of the website will contain information for an interested general public: this includes project demonstration videos, fact sheets on language learning and reports of our work for a lay audience. Finally, a press section will contain press releases and media kits for the printed, radio, television and web media.
